Subject: Willamette River Pollution

I am writing to comment on the Portland Harbor Superfund Cleanup Plan that was recently released.

1. The cleanup plan leaves far too much of the river contaminated for generations to come.
2. The plan relies too much on natural recovery in the hopes that pollution will be flushed downstream.
3. Creating a toxic-waste disposal dump in the river is not acceptable. Sediments should be taken to a landfill.
4. The 140 parties responsible for the pollution in the Willamette should be held accountable and pay for the cleanup.

Everyone lives downstream and all humans, wildlife, and the environment deserve a clean river.
